

Engineering

A professional preparation of a planned investment needs an expert analysis of the technical and technological requirements, a financial estimate and a implementation concept. The implementation of a project should be accompanied by engineering experts to ensure high quality work.

PROSYS has long standing national and international experience in preparing sophisticated and forward-looking solutions taking cost effectiveness into account. The production of documentation, manuals and automation concepts are part of our specialist services.

Scope of supply and services:

- Conceptual design for automation plants
- Conceptual design for realization of automation plants
- Project leader
- Construct of documentation
- Construct of P&ID drawing with AutoCAD
- Construct of circuit diagrams with WSCAD

CAD - workstation
